Forward-Looking Statements

The Presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and other securities laws that are subject to risks and uncertainties. These statements may include words such as "believe", "expect", "anticipate", "intend", "plan", "estimate", "will", "may" and negatives or derivatives of these or similar expressions. These forward-looking statements include, among others, statements about: OPT's future leasing activity and pipeline and options to address upcoming debt maturities.

Forward-looking statements reflect OPT's current expectations, are based on judgments and assumptions, are inherently uncertain and are subject to risks, uncertainties and other factors, which could cause OPT's actual results, performance or achievements to differ materially from expected future results, performance or achievements expressed or implied in these forward-looking statements. Some of the risks, uncertainties and other factors that may cause OPT's actual results, performance or achievements to differ materially from those expressed or implied by forward-looking statements include, but are not limited to, the following: OPT's ability to make required payments on debt or refinance debts as they mature or otherwise become due; OPT's ability to maintain sufficient liquidity, including the availability of borrowings under its revolving credit facility and its ability to obtain new debt financing, and otherwise manage leverage; OPT's ability to comply with the terms of its debt agreements and meet financial covenants; OPT's ability to effectively raise and balance its use of debt and equity capital, the extent to which changes and trends in office space utilization and needs, including due to remote work arrangements, continue to impact demand for office space at OPT's properties; whether OPT's tenants will renew or extend their leases and not exercise early termination options pursuant to their leases or that OPT will obtain replacement tenants on terms as favorable to OPT as its prior leases; OPT's ability to increase or maintain occupancy at its properties on terms desirable to OPT; and OPT's ability to increase rents when its leases expire or renew; competition within the commercial real estate industry, particularly in the markets in which OPT's properties are located; the impact of unfavorable market and commercial real estate industry conditions due to high interest rates, prolonged high inflation, labor market challenges, supply chain disruptions, volatility in the public equity and debt markets and in commercial real estate markets, generally and in the sectors OPT operates, geopolitical instability and tensions, economic downturns or a possible recession or changes in real estate utilization, among other things, on OPT and its tenants; the likelihood that OPT's tenants will pay rent or be negatively impacted by continuing unfavorable market and commercial real estate industry conditions or government budget constraints; OPT's ability to manage its capital expenditures and other operating costs effectively and to maintain and enhance its properties and their appeal to tenants; the financial strength of OPT's tenants; OPT's ability to sell properties at prices it targets; OPT's tenant and geographic concentration; risks and uncertainties regarding the costs and timing of development, redevelopment and repointing activities, including as a result of prolonged high inflation, cost overruns, supply chain challenges, labor shortages, construction delays or inability to obtain necessary permits or volatility in the commercial real estate markets; OPT's ability to acquire properties that realize its targeted return; OPT's credit ratings; OPT's ability to pay distributions to its shareholders and to maintain or increase the amount of such distributions; the ability of OPT's manager, The RMR Group LLC ("RMR"), to successfully manage OPT; compliance with, and changes to, federal, state and local laws and regulations, accounting rules, tax laws and similar matters; the impact of any U.S. government shutdown or failure to increase the government debt ceiling on OPT's ability to collect rents and pay its operating expenses, debt obligations and distributions to shareholders on a timely basis; actual and potential conflicts of interest with OPT's related parties, including its Managing Trustees, RMR, Sonesta International Hotels Corporation, and others affiliated with them; limitations imposed by and OPT's ability to satisfy complex rules to maintain OPT's qualification for taxation as a REIT for U.S. federal income tax purposes; acts of terrorism, outbreaks of pandemics or other public health safety events or conditions, war or other hostilities, global climate change or other manmade or natural disasters beyond OPT's control, and other matters.

Risk Factors

These risks, uncertainties and other factors are not exhaustive and should be read in conjunction with other cautionary statements that are included in OPT's periodic filings. The information contained in OPT's filings with the SEC, including under the caption "Risk Factors" in its periodic reports, or incorporated therein, identifies other important factors that could cause differences from the forward-looking statements in this Presentation. OPT's filings with the SEC are available on the SEC's website at www.sec.gov.

You should not place undue reliance upon OPT's forward-looking statements. Except as required by law, OPT does not intend to update or change any forward-looking statements as a result of new information, future events or otherwise. There is no certainty that these properties will be sold or sold at the prices currently projected. Office dispositions are challenging in this economic environment where property valuations have been negatively impacted within the office sector and financing may not be readily available to buyers. OPT faces additional challenges because almost all the properties identified for sale are vacant or soon to be vacant, which further reduces the pool of potential buyers.

Notes Regarding Certain Information in this Presentation

This Presentation contains industry and statistical data that OPT obtained from various third party sources. Nothing in the data used or derived from third party sources should be construed as investment advice. Some data and other information presented are also based on our good faith estimates and beliefs, derived from our review of internal surveys and independent sources and our experience. OPT believes that these external sources, estimates and beliefs are reliable and reasonable, but OPT has not independently verified them. Although OPT is not aware of any misstatements regarding the data presented herein, these estimates and beliefs involve inherent risks and uncertainties and are based on assumptions that are subject to change. Each Recipient should take such steps as it deems necessary to assure that it has the information it considers material and should perform its own independent investigation and analysis in connection therewith. By accepting this Presentation, each Recipient represents that it is sophisticated and capable of evaluating investment risks independently.

By accepting delivery of this Presentation, each Recipient acknowledges and agrees to undertake and rely on its own independent investigation and analysis and consult with its own attorneys, accountants and other professional advisors regarding OPT, including all related legal, investment, accounting, tax and other matters. Further, by accepting delivery of this Presentation, each Recipient will be deemed to acknowledge and agree to the matters set forth in this Disclaimer including, without limitation, the matters set forth in the sections titled "Forward Looking Statements."

Non-GAAP Financial Measures

Please refer to Non-GAAP Financial Measures and Certain Definitions in the Appendix for terms used throughout this Presentation.

BUSINESS PLAN SUMMARY

Commentary

- NOI levels are expected to stabilize as large single tenant known vacancies are largely behind OPI.
- Experiencing improved leasing velocity at multi-tenant/urban assets with amenities.
- Current leasing pipeline totals nearly 2 million sq. ft., of which, one-third could result in positive net absorption.
- Continued focus on leasing; since Q1 2024, OPI has successfully renewed 60% of the leases (by Annualized Rental Income) expiring in 2026.
- OPI has identified additional property disposition candidates to increase liquidity and/or reduce the negative carry costs of vacant properties, with a focus on challenged properties and/or markets.
- Capital expenditures are primarily tied to leasing activity. Modest, but prudent, building maintenance capital spend ("Building Capex") is planned.

Commentary

- Business Plan assumptions include a 50-75% renewal probability rate with 18-24 months of down time to re-lease vacating space during projection period.
- Average deal concessions assume one month of free rent per lease year, \$5 per sq. ft. per lease year in tenant improvement allowances and a 6% lease commission.
- For the remainder of 2025, we expect (816) sq. ft. of net absorption.
- Retention/absorption of 2026 expirations is projected to be 95%.
- OPI is closely monitoring the Department of Government Efficiency's measures to reduce the government's office square footage, as part of its efforts to optimize its real estate. While the ultimate impact on OPI's portfolio remains uncertain, no lease termination notices related to these efficiency measures have been received.

⁽¹⁾ Based on OPI's current expectations regarding leasing expirations, potential termination options and leasing activity.

⁽²⁾ Represents sq. ft. vacating as a percentage of Lease Expirations sq. ft. for each respective year.

- \$53 million in anticipated spend on Speculative Leasing Capex in 2025-26 that will drive NOI growth.
- \$24 million in essential Building Capex in 2025-26 (mechanical systems, roofs, etc.).
- \$4 million in Redevelopment Capex is focused on planning and entitlement costs related to potential redevelopment projects.

NON-GAAP FINANCIAL MEASURES AND CERTAIN DEFINITIONS

Non-GAAP Financial Measures

OPI presents certain "non-GAAP financial measures" within the meaning of the applicable rules of the Securities and Exchange Commission, or the SEC, including Cash Flow, Cash Basis NOI. These measures do not represent cash generated by operating activities in accordance with GAAP and should not be considered alternatives to net (loss) income as indicators of OPI's operating performance or as measures of OPI's liquidity. These measures should be considered in conjunction with net (loss) income as presented in OPI's condensed consolidated statements of income (loss). OPI considers these non-GAAP measures to be appropriate supplemental measures of operating performance for a REIT, along with net (loss) income. OPI believes these measures provide useful information to investors because by excluding the effects of certain historical amounts, such as depreciation and amortization expense, they may facilitate a comparison of OPI's operating performance between periods and with other REITs and, in the case of Cash Basis NOI reflecting only those income and expense items that are generated and incurred at the property level may help both investors and management to understand the operations of OPI's properties.

Cash Basis NOI

The calculations of Cash Basis NOI exclude certain components of net (loss) income in order to provide results that are more closely related to OPI's property level results of operations. OPI calculates Cash Basis NOI. OPI defines Cash Basis NOI as NOI excluding non-cash straight line rent adjustments, lease value amortization, lease termination fees, if any, and non-cash amortization included in other operating expenses. OPI uses Cash Basis NOI, to evaluate individual and company-wide property level performance. Other real estate companies and REITs may calculate Cash Basis NOI differently than OPI does.

Cash Flow Before G&A and Debt Service

OPI calculates Cash Flow Before G&A and Debt Service as Cash Basis NOI less total Building Capex, Leasing Capex and Redevelopment Capex.

Annualized Rental Income is calculated using the annualized contractual base rents from OPI's tenants pursuant to its lease agreements as of June 30, 2024, plus straight line rent adjustments and estimated recurring expense reimbursements to be paid to OPI and excluding lease value amortization.

Building Capex generally include expenditures to replace obsolete building components and expenditures that extend the useful life of existing assets.

GAAP is U.S. generally accepted accounting principles.

Gross Book Value (GBV) is real estate properties at cost, plus certain acquisition costs, if any, before depreciation and purchase price allocations, less impairment writedowns, if any.

Investment grade tenants include: (a) investment grade rated tenants; (b) tenants with investment grade rated parent entities that guarantee the tenant's lease obligations; and/or (c) tenants with investment grade rated parent entities that do not guarantee the tenant's lease obligations. Tenants contributing 52.2% of annualized rental income as of March 31, 2025 were investment grade rated (or their payment obligations were guaranteed by an investment grade rated parent) and tenants contributing an additional 7.7% of annualized rental income as of March 31, 2025 were subsidiaries of an investment grade rated parent (although these parent entities are not liable for the payment of rents).

Leasing Capex generally include capital expenditures used to improve tenants' space or amounts paid directly to tenants to improve their space and leasing related costs, such as brokerage commissions and tenant inducements.

MSA is metropolitan statistical area.

Rentable sq. ft. represents total square feet available for lease as of the measurement date. Square footage measurements are subject to changes when space is remeasured or reconfigured for new tenants.

WALT by Revenue is the average remaining lease term in years weighted based on annualized rental income.
