**DECLARATION OF  
RACHEL MURRAY IN SUPPORT OF CONFIRMATION OF  
THIRD AMENDED JOINT CHAPTER 11 PLAN OF REORGANIZATION  
OF OFFICE PROPERTIES INCOME TRUST AND ITS DEBTOR AFFILIATES**

I, Rachel Murray, hereby declare as follows:

1. I am a Managing Director at Moelis & Company LLC (together with its affiliates, “**Moelis**”), the financial advisor and investment banker to the above-captioned debtors and debtors in possession (collectively, the “**Debtors**”). I submit this declaration (the “**Declaration**”) in support of the *Third Amended Joint Chapter 11 Plan of Reorganization of Office Properties Income Trust and Its Debtor Affiliates*, filed on April 8, 2026 [Docket No. 1174] (as may be amended, supplemented, or otherwise modified, the “**Plan**”).<sup>2</sup>

2. Specifically, I offer this Declaration to support Moelis’ view that (a) the enterprise value of the Reorganized Debtors on a going concern basis as of May 1, 2026 (the “**Assumed Valuation Date**,” and such enterprise value, the “**Enterprise Value**”) would be in a range between \$2,050 million to \$2,250 million, and (b) after adjusting for net debt, the implied equity value of

---

<sup>1</sup> A complete list of the Debtors in the Chapter 11 Cases may be obtained on the website of the Debtors’ claims and noticing agent at <https://restructuring.ra.kroll.com/OPI>. The Debtors’ mailing address is Two Newton Place, 255 Washington Street, Suite 300, Newton, Massachusetts 02458-1634.

<sup>2</sup> Capitalized terms used but not defined herein shall have the meaning ascribed to them in the Plan or the Disclosure Statement.

the Reorganized Debtors (the “*Equity Value*”) would be in a range between \$343 million to \$543 million.

3. Except where specifically noted, my statements here are based on (a) my personal knowledge and involvement as an advisor to the Debtors, (b) information regarding the Debtors’ operations and finances that I obtained from the Debtors’ advisors and employees, (c) the Debtors’ books, records, and relevant documents, (d) information provided to me by employees of Moelis working under my supervision, or (e) my opinions, experience, and knowledge as a restructuring professional. I am not specifically being compensated for providing this testimony other than through payments Moelis may receive as a professional on behalf of the Debtors. I am over the age of 18 years and authorized to submit this Declaration on behalf of the Debtors. If called upon to testify, I could and would competently testify to the facts set forth herein.

#### **I. Background and Qualifications**

4. As noted, I am a Managing Director at Moelis, which is a leading international investment banking and financial advisory firm (NYSE: MC) with approximately 1,400 employees in locations around the world. Moelis provides a broad range of investment banking and financial advisory services including in connection with (a) mergers and acquisitions, (b) recapitalization and restructuring, (c) capital markets, and (d) private capital advisory. Moelis has been, and is, involved in large and complex restructuring cases throughout the United States, including as advisors to debtors, creditors, acquirers, and official committees in numerous chapter 11 cases in this and other districts.

5. I have nearly 12 years of experience in investment banking, providing in-court and out-of-court recapitalization and restructuring advisory services to companies, creditors, sponsors, and other interested parties. I have specific expertise with both in- and out-of-court restructuring transactions, capital raising, mergers and acquisitions, lender negotiations, and distressed

financings. I have represented clients across a range of industries, including but not limited to American Tire Distributors, Inc., Knotel, Inc., Jason Industries, Inc., Hornbeck Offshore Services Inc., Monitronics International, Inc., iHeartMedia, Inc., ATD Corporation, Talen Energy Supply, LLC, Aegerion Pharmaceuticals, Inc., and Joerns WoundCo Holdings, Inc.

6. Prior to joining Moelis, I worked in the external audit practice at Deloitte. I received an M.B.A. from The Wharton School at the University of Pennsylvania, a Masters in Accounting from the Leventhal School at the University of Southern California, and a Bachelors of Arts in Government from Harvard University. I also am a Certified Public Accountant.

7. On October 6, 2023, the Debtors engaged Moelis to serve as their investment banker in connection with various strategic alternatives, liability management transactions and financing-related workstreams. I understand that the Debtors engaged Moelis for these roles because of our familiarity with the Company and its industry, our expertise on issues relating to financially distressed companies, and our extensive experience acting as an advisor in both in- and out-of-court restructurings of companies of all sizes across a wide array of industries. As a Managing Director, I have been responsible for the day-to-day activities of the Moelis deal team on this matter. At the direction of the Debtors' board of trustees (the "**Board**"), Moelis has assisted the Debtors in their efforts to consummate various refinancings, note issuances, private-debt exchanges, and equity-related transactions implemented to address their near-term maturities, capture discounts, and manage liquidity. Throughout its engagement, I and others on the Moelis team have worked closely with the Debtors' management and other professionals and have become well-acquainted with the Debtors' capital structure, liquidity needs, and business operations.

## **II. Overview of Valuation Analysis Findings**

8. At the direction of the Debtors, Moelis prepared a valuation analysis (the "**Valuation Analysis**") to estimate the enterprise value of the Reorganized Debtors on a going

concern basis as of May 1, 2026. The Valuation Analysis is based on the business plan prepared by the Debtors' management and the economic, monetary, market, and other conditions as in effect on, and the information made available to Moelis as of the date of, its analysis (February 11, 2026). The Valuation Analysis was filed at Docket No. 1005-2 on March 13, 2026, and was included as Exhibit E to the *Disclosure Statement for Second Amended Joint Chapter 11 Plan of Reorganization of Office Properties Income Trust and Its Debtor Affiliates*, filed on March 16, 2026 [Docket No. 1017] (the "***Disclosure Statement***"). A true and correct copy of the Valuation Analysis is also attached here as Exhibit A.

9. As set forth in the Valuation Analysis, Moelis' view was that the Enterprise Value of the Reorganized Debtors, as of the Assumed Valuation Date, would be in a range between \$2,050 million to \$2,250 million. After adjusting for net debt, the Equity Value based on the Valuation Analysis would be in a range between \$343 million and \$543 million.<sup>3</sup>

10. Moelis used multiple methodologies to arrive at its conclusions regarding the Debtors' Enterprise Value. These methodologies were applied in combination, and no single methodology was determinative. Specifically, Moelis performed a discounted cash flow ("***DCF***") analysis, an analysis of selected publicly traded companies, and an analysis of selected transactions involving comparable companies, each of which is addressed in order below. After arriving at an Enterprise Value range, Moelis subtracted the expected net debt based on the Debtors' pro forma capital structure at emergence to arrive at an Equity Value range.

---

<sup>3</sup> All equity allocations are calculated based on an enterprise value of \$1.75 billion, in accordance with the Committee Settlement, and an equity valuation of \$428 million. The Plan settlements involving equity distributions were struck at that \$428 million figure before the 2027 Senior Secured Notes Claims Settlement was reached. The 2027 Senior Secured Notes Claims Settlement subsequently increased the overall enterprise value and thus the implied equity value, but it did not change the allocation of equity among the parties.

11. **DCF.** The DCF analysis is a valuation methodology that estimates the value of an asset or business by calculating the present value of expected future cash flows to be generated by that asset or business plus a present value of the estimated terminal value of that asset or business. As described in more detail in the Disclosure Statement, Moelis' DCF analysis used the Financial Projections' estimated debt-free, after-tax free cash flows through December 31, 2030.<sup>4</sup> These cash flows were then discounted at a range of estimated weighted average costs of capital ("**Discount Rate**") for the Reorganized Debtors. The Discount Rate reflects the estimated blended rate of return that would be expected by debt and equity investors in the Reorganized Debtors' business based on a target capital structure. In determining the estimated terminal value of the Reorganized Debtors, Moelis utilized the implied cap rate method which estimates a range of values for the Reorganized Debtors at the end of the Projection Period based on applying a range of cap rates to final year net operating income.

12. In estimating a range of cap rates for its DCF analysis, Moelis took into account (a) the Debtors' growth, profitability and free cash flow profile in the terminal period; and (b) market cap rates (calculated as net operating income divided by market value of real estate) of selected publicly traded real estate investment trusts ("**REITs**") deemed generally relevant by Moelis that predominantly own office real estate in the United States, with a focus on REITs with exposure to low-barrier-to-entry markets that have operating and financial characteristics comparable in certain respects to the Reorganized Debtors. To determine the Discount Rate, Moelis used the estimated cost of equity and the estimated after-tax cost of debt for the Reorganized Debtors, assuming a targeted, long-term, debt-to-total capitalization ratio (based on

---

<sup>4</sup> The Financial Projections are attached as Exhibit D to the Disclosure Statement.

debt-to-capitalization ratios of the selected publicly traded companies and the proposed capital structure contemplated by the Plan).

13. **Selected Publicly Traded Comparable Companies.** Moelis conducted a selected publicly traded company analysis to determine an appropriate market cap rate for the Reorganized Debtors. The selected publicly traded companies analysis is based on the market cap rates (calculated as net operating income divided by market value of real estate) of selected publicly traded REITs deemed generally relevant by Moelis that own predominately office real estate in the United States, with a focus on REITs with exposure to low-barrier-to-entry markets that have operating and financial characteristics comparable in certain respects to the Reorganized Debtors. For example, such characteristics may include similar size, financial leverage, business model, geographic footprint, tenant characteristics, and asset profile. Under this methodology, Moelis applied a relevant cap rate range to the Reorganized Debtors' net operating income to derive a range of potential values of the Reorganized Debtors' business.

14. **Selected Transactions.** In connection with its selected transactions analysis, Moelis examined publicly disclosed mergers and acquisitions in the REIT sector since 2020. The selected transactions analysis is based on the implied cap rates for selected publicly disclosed mergers and acquisitions transactions for REITs generally deemed relevant by Moelis in certain aspects to this transaction. Those targets REITs deemed relevant by Moelis had operating, portfolio, and financial characteristics were comparable in certain respects to the Reorganized Debtors. Moelis then applied a relevant cap rate range to the Reorganized Debtors' net operating income to derive a range of potential values of the Reorganized Debtors' business.

### **III. Moelis' Valuation Assumptions and Process**

15. At the Debtors' direction, the Valuation Analysis is based on a number of assumptions, including the following: (a) the Debtors will be reorganized in accordance with the

Plan, which will be effective on the Assumed Valuation Date; (b) the Reorganized Debtors will achieve the financial results set forth in the Financial Projections provided to Moelis by the Debtors; (c) the Reorganized Debtors' capitalization and available cash will be as set forth in the Plan and the Disclosure Statement; (d) the Reorganized Debtors will sell assets in line with the dispositions schedule provided to Moelis by the Debtors; and (e) the Reorganized Debtors will be able to obtain all future financings, on the terms and at the times, necessary to achieve the results set forth in the Financial Projections. Moelis also assumed, at the Debtors' direction, that the Financial Projections prepared by the Debtors' management were reasonably prepared on a basis reflecting the Debtors' management's best currently available estimates and judgments of the Debtors' management as to the future financial and operating performance of the Reorganized Debtors.

16. In preparing the Valuation Analysis, my team and I undertook a comprehensive process to determine the Enterprise Value of the Reorganized Debtors. Among other things, we: (a) reviewed certain publicly available business and financial information relating to the Reorganized Debtors that Moelis deemed relevant (*i.e.*, historical filings, court filings, information as part of the current Chapter 11 process, etc.); (b) reviewed Financial Projections, furnished to Moelis by the Debtors; (c) reviewed the projected capitalization of the Reorganized Debtors; (d) conducted discussions with members of senior management and representatives of the Debtors concerning the matters described in clauses (a) through (c) of this paragraph, as well as their views concerning the Debtors' business and prospects before giving effect to the Plan, and the Reorganized Debtors' business and prospects after giving effect to the Plan; (e) reviewed publicly available financial and stock market data for certain other companies in lines of business that Moelis deemed relevant; (f) reviewed publicly available financial data for certain transactions that

Moelis deemed relevant; and (g) conducted such other financial studies and analyses and took into account such other information as Moelis deemed appropriate.

17. In connection with its review, Moelis did not assume any responsibility for independent verification of any of the information supplied to, discussed with, or reviewed by Moelis and, with the consent of the Debtors, relied on such information being complete and accurate in all material respects. In addition, at the direction of the Debtors, Moelis did not make any independent evaluation or appraisal of any of the assets or liabilities (contingent, derivative, off-balance-sheet, tax-related or otherwise) of the Reorganized Debtors.

#### **IV. DIP Equitization**

18. Under the Plan, certain amounts due under the DIP Facility, including amounts in respect of principal and certain fees and expenses (including the DIP Upfront Fee), will be satisfied in Reorganized Equity at a discount to Plan value of 37% (the “*Equity Discount*”).<sup>5</sup> Moelis conducted an extensive, formal prepetition marketing process for postpetition financing. The parties contacted by Moelis that did not submit indications of interest reported that they were unwilling to extend financing to the Debtors due to a number of factors, including the inability or unwillingness to equitize a DIP facility. Ultimately, the Debtors viewed the option to equitize DIP financing at emergence as a material benefit of the DIP Facility because it gave the Debtors the ability to exit chapter 11 with an amount of leverage that they believed to be sustainable.<sup>6</sup>

19. The Equity Discount was also extensively negotiated among the Debtors and the September 2029 Ad Hoc Group. The Debtors began negotiating with the advisors to the September

---

<sup>5</sup> The DIP Anchor Capital Commitment and DIP Exit fee will be satisfied in Reorganized Equity with no discount to Plan value.

<sup>6</sup> The marketing process for the DIP Facility is also described in detail in my prior declaration in support of the Debtors’ motion to secure postpetition financing [Docket No. 34].

2029 Ad Hoc Group regarding a potential restructuring in June 2025. Following months of negotiations, in mid-October 2025, the Debtors and the September 2029 Ad Hoc Group reached consensus on the key elements of an in-court restructuring transaction and necessary postpetition financing. The Debtors and their advisors actively negotiated the terms of the DIP Facility with the September 2029 Ad Hoc Group throughout this process, including the Equity Discount.

20. In addition, as part of the prepetition negotiations regarding postpetition financing, the Debtors engaged with other creditor constituencies that were willing to provide DIP financing to determine whether they would be willing to equitize on similar terms as the September 2029 Ad Hoc Group but at a lower discount. None of these parties presented the Debtors with a better DIP financing proposal on a comprehensive basis than the DIP Facility. All but one of the proposals did not permit equitization. The one proposal that included an equitization component also included certain unfavorable terms and increased execution risk that, in the Debtors view, made the proposal not actionable compared to the DIP Facility.

21. In evaluating the Equity Discount, Moelis, in concert with the Debtors' other advisors, reviewed equity discounts in comparable equity rights offerings and determined that the Equity Discount was reasonable under the circumstances. The set of comparable transactions reviewed is attached hereto as **Exhibit B**. Based on these factors, together with my knowledge and experience, I believe the Equity Discount set forth in the Plan is reasonable under the circumstances, was fully marketed, was the product of extensive and good faith, arm's-length negotiations, and will allow the Debtors to seek to maximize the value of their estates under the circumstances.

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury that the foregoing statements are true and correct to the best of my knowledge, information, and belief.

Dated: April 20, 2026

Moelis & Company LLC

**Exhibit A**

**Valuation Analysis**

### **Exhibit E: Reorganized Debtors' Valuation Analysis**<sup>1</sup>

THE VALUATION INFORMATION CONTAINED HEREIN IS NOT A PREDICTION OR GUARANTEE OF THE ACTUAL MARKET VALUE THAT MAY BE REALIZED THROUGH THE SALE OF ANY SECURITIES TO BE ISSUED PURSUANT TO THE PLAN. THIS VALUATION IS PRESENTED SOLELY FOR THE PURPOSE OF PROVIDING ADEQUATE INFORMATION AS REQUIRED BY SECTION 1125 OF THE BANKRUPTCY CODE TO ENABLE THE HOLDERS OF CLAIMS ENTITLED TO VOTE TO ACCEPT OR REJECT THE PLAN TO MAKE AN INFORMED JUDGMENT ABOUT THE PLAN AND SHOULD NOT BE USED OR RELIED UPON FOR ANY OTHER PURPOSE, INCLUDING THE PURCHASE OR SALE OF CLAIMS AGAINST OR INTERESTS IN THE DEBTORS.

At the Debtors' request, Moelis & Company LLC ("**Moelis**") performed a valuation analysis to estimate the enterprise value of the Reorganized Debtors on a going concern basis as of May 1, 2026 (the "**Enterprise Value**"). For purposes of this Valuation Analysis, the term "Reorganized Debtors" includes each of the Debtors from and after the Effective Date.

The valuation analysis set forth herein (this "**Valuation Analysis**") is based on the business plan prepared by the Debtors' management.

Based upon and subject to the review and analysis described herein, and subject to the assumptions, limitations and qualifications described herein, Moelis' view, as of February 11, 2026, was that the Enterprise Value of the Reorganized Debtors, as of an assumed valuation date, for purposes of Moelis' valuation analysis, of May 1, 2026 (the "**Assumed Valuation Date**"), would be in a range between \$2,050 million and \$2,250 million. After adjusting for expected net debt, the implied equity value (the "**Equity Value**") would be in a range between \$343 million and \$543 million.

Moelis' views are necessarily based on economic, monetary, market, and other conditions as in effect on, and the information made available to Moelis as of the date of its analysis (February 11, 2026). It should be understood that, although subsequent developments may affect Moelis' views, Moelis does not have any obligation to update, revise, or reaffirm its analysis or its estimate.

Moelis' analysis is based, at the Debtors' direction, on a number of assumptions, including, among other assumptions, that: (a) the Debtors will be reorganized in accordance with the Plan, which will be effective on the Assumed Valuation Date; (b) the Reorganized Debtors will achieve the results set forth in the Debtors' management's financial projections attached as Exhibit D to this Disclosure Statement (the "**Financial Projections**") for 2026 through 2030 (the "**Projection Period**") provided to Moelis by the Debtors; (c) the Reorganized Debtors' capitalization and available cash will be as set forth in the Plan and this Disclosure Statement; (d) the Reorganized Debtors will sell assets in line with the dispositions schedule provided to Moelis by the Debtors; and (e) the Reorganized Debtors will be able to obtain all future financings, on the terms and at the times, necessary to achieve the results set forth in the Financial Projections. Moelis makes no representation as to the achievability or reasonableness of such assumptions. In addition, Moelis assumed that there will be no material change in economic, monetary, market, and other conditions as in effect on, and the information made available to Moelis, as of the Assumed Valuation Date.

---

<sup>1</sup> Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to them in Plan.

Moelis assumed, at the Debtors' direction, that the Financial Projections prepared by the Debtors' management were reasonably prepared on a basis reflecting the Debtors' management's best currently available estimates and judgments of the Debtors' management as to the future financial and operating performance of the Reorganized Debtors. The future results of the Reorganized Debtors are dependent upon various factors, many of which are beyond the control or knowledge of the Debtors, and consequently are inherently difficult to project. The Reorganized Debtors' actual future results may differ materially (positively or negatively) from the Financial Projections and, as a result, the actual enterprise value and/or equity value of the Reorganized Debtors may be materially higher or lower than the estimated range herein. Among other things, failure to consummate the Plan in a timely manner may have a materially negative impact on the enterprise value and/or equity value of the Reorganized Debtors.

The estimated Enterprise Value and Equity Value set forth above represent hypothetical enterprise value and equity value of the Reorganized Debtors as the continuing operators of the business and assets of the Debtors, after giving effect to the Plan, based on consideration of certain valuation methodologies as described below. The estimated Enterprise Value and Equity Value in this section do not purport to constitute an appraisal or necessarily reflect the actual market values that might be realized through a sale or liquidation of the Reorganized Debtors, their securities or their assets, which may be materially higher or lower than the estimated value ranges herein. The actual value of an operating business such as the Reorganized Debtors' business is subject to uncertainties and contingencies that are difficult to predict and will fluctuate with changes in various factors affecting the financial condition and prospects of such a business.

In conducting its analysis, Moelis, among other things: (a) reviewed certain publicly available business and financial information relating to the Reorganized Debtors that Moelis deemed relevant (*i.e.*, historical filings, court filings, information as part of the current Chapter 11 process, etc.); (b) reviewed Financial Projections, furnished to Moelis by the Debtors; (c) reviewed the projected capitalization of the Reorganized Debtors; (d) conducted discussions with members of senior management and representatives of the Debtors concerning the matters described in clauses (a) through (c) of this paragraph, as well as their views concerning the Debtors' business and prospects before giving effect to the Plan, and the Reorganized Debtors' business and prospects after giving effect to the Plan; (e) reviewed publicly available financial and stock market data for certain other companies in lines of business that Moelis deemed relevant; (f) reviewed publicly available financial data for certain transactions that Moelis deemed relevant; and (g) conducted such other financial studies and analyses and took into account such other information as Moelis deemed appropriate. In connection with its review, Moelis did not assume any responsibility for independent verification of any of the information supplied to, discussed with, or reviewed by Moelis and, with the consent of the Debtors, relied on such information being complete and accurate in all material respects. In addition, at the direction of the Debtors, Moelis did not make any independent evaluation or appraisal of any of the assets or liabilities (contingent, derivative, off-balance- sheet, tax-related or otherwise) of the Reorganized Debtors. Moelis also assumed, with the Debtors' consent, that the final form of the Plan does not differ in any respect material to its analysis from the final draft of the Plan that Moelis reviewed.

The estimated Enterprise Value and Equity Value in this section do not constitute a

recommendation to any Holder of a Claim or Interest as to how such Holder of a Claim or Interest should vote or otherwise act with respect to the Plan. Moelis has not been asked to and does not express any view as to what the trading value of the Reorganized Debtors' securities would be when issued pursuant to the Plan or the prices at which they may trade in the future. The estimated Enterprise Value and Equity Value set forth herein do not constitute an opinion as to fairness from a financial point of view to any Holder of a Claim or Interest of the consideration to be received by such Holder of a Claim or Interest under the Plan, if any, or of the terms and provisions of the Plan.

*[Remainder of page intentionally left blank]*

## Valuation Methodologies

In preparing its valuation, Moelis performed a variety of financial analyses and considered a variety of factors. The following is a brief summary of the material financial analyses performed by Moelis, which consisted of: (a) a discounted cash flow analysis; (b) a selected publicly traded companies analysis; and (c) a selected transactions analysis. This summary does not purport to be a complete description of the analyses performed and factors considered by Moelis. The preparation of a valuation analysis is a complex analytical process involving various judgmental determinations as to the most appropriate and relevant methods of financial analysis and the application of those methods to particular facts and circumstances, and such analyses and judgments are not readily susceptible to summary description. As such, Moelis' valuation analysis must be considered as a whole. Reliance on only one of the methodologies used, or portions of the analysis performed, could create a misleading or incomplete conclusion as to enterprise value.

**A. Discounted Cash Flow Analysis.** The discounted cash flow ("**DCF**") analysis is a valuation methodology that estimates the value of an asset or business by calculating the present value of expected future cash flows to be generated by that asset or business plus a present value of the estimated terminal value of that asset or business. Moelis' DCF analysis used the Financial Projections' estimated debt-free, after-tax free cash flows through December 31, 2030. These cash flows were then discounted at a range of estimated weighted average costs of capital ("**Discount Rate**") for the Reorganized Debtors. The Discount Rate reflects the estimated blended rate of return that would be expected by debt and equity investors in the Reorganized Debtors' business based on a target capital structure. In determining the estimated terminal value of the Reorganized Debtors, Moelis utilized the implied cap rate method which estimates a range of values for the Reorganized Debtors at the end of the Projection Period based on applying a range of cap rates to final year net operating income. In estimating a range of cap rates for its DCF analysis, Moelis took into account (a) the Debtors' growth, profitability and free cash flow profile in the terminal period; and (b) market cap rates (calculated as net operating income divided by market value of real estate) of selected publicly traded real estate investment trusts ("**REITs**") deemed generally relevant by Moelis that own predominately office real estate in the United States, with a focus on REITs with exposure to low-barrier-to-entry markets that have operating and financial characteristics comparable in certain respects to the Reorganized Debtors. For example, such characteristics may include similar size, financial leverage, business model, geographic footprint, tenant characteristics, and asset profile.

To determine the Discount Rate, Moelis used the estimated cost of equity and the estimated after-tax cost of debt for the Reorganized Debtors, assuming a targeted, long-term, debt-to-total capitalization ratio (based on debt-to-capitalization ratios of the selected publicly traded companies and the proposed capital structure contemplated by the Plan). Moelis calculated the cost of equity based on (a) the capital asset pricing model, which assumes that the expected equity return is a function of the risk-free rate, equity risk premium, and the correlation of the stock performance of the selected publicly traded companies to the return on the broader market, and (b) an adjustment related to the estimated equity market capitalization of the Reorganized Debtors, which reflects the historical equity risk premium of small, medium, and large equity market capitalization companies. To estimate the cost of debt, Moelis held

discussions with its capital markets team and determined a cost of debt rate based on the Reorganized Debtors' size, industry, geographic footprint, cash flow profile as well as the current market environment, long-term corporate credit spreads for secured debt and an understanding of certain existing OPI debt instruments. Moelis utilized the Debtors' management's assumptions in determining a go-forward tax rate.

- B. *Selected Publicly Traded Companies Analysis*** The selected publicly traded companies analysis is based on the market cap rates (calculated as net operating income divided by market value of real estate) of selected publicly traded REITs deemed generally relevant by Moelis that own predominately office real estate in the United States, with a focus on REITs with exposure to low-barrier-to-entry markets that have operating and financial characteristics comparable in certain respects to the Reorganized Debtors. For example, such characteristics may include similar size, financial leverage, business model, geographic footprint, tenant characteristics, and asset profile. Under this methodology, Moelis applied a relevant cap rate range to the Reorganized Debtors' pro rata net operating income to derive a range of potential values of the business of the Reorganized Debtors.

Although the selected companies were used for comparison purposes, no selected publicly traded company is either identical or directly comparable to the business of the Reorganized Debtors. Accordingly, Moelis' comparison of selected publicly traded companies to the business of the Reorganized Debtors and analysis of the results of such comparisons was not purely mathematical, but instead involved considerations and judgments concerning differences in operating and financial characteristics and other factors that could affect the relative values of the selected publicly traded companies and the Reorganized Debtors. The selection of appropriate companies for this analysis is a matter of judgment and subject to limitations due to sample size and the public availability of meaningful market-based information.

- C. *Selected Transactions Analysis*** The selected transactions analysis is based on the implied cap rates for selected publicly disclosed merger-and-acquisition transactions for REITs deemed generally relevant by Moelis in certain aspects to this transaction for which the targets had operating, portfolio, and financial characteristics comparable in certain respects to the Reorganized Debtors. Under this methodology, Moelis applied a relevant cap rate range to the Reorganized Debtors' pro rata net operating income to derive a range of potential values of the business of the Reorganized Debtors. Moelis analyzed various merger and acquisition transactions that have occurred in the office REIT sector since 2020.

Although the selected precedent transactions were used for comparison purposes, no company included in the selected precedent transaction analysis is either identical or directly comparable to the business of the Reorganized Debtors. Accordingly, Moelis' comparison of selected precedent transactions to the business of the Reorganized Debtors and analysis of the results of such comparisons was not purely mathematical, but instead involved considerations and judgments concerning differences in operating and financial characteristics and other factors that could affect the relative values implied by the selected precedent transactions analysis and the Reorganized Debtors. The selection of appropriate transactions for this analysis is a matter of judgment and subject to limitations due to sample size and the public availability of

meaningful market-based information.

Other factors not directly related to a company's business operations can affect a valuation in a transaction, including, among others factors, the following: (a) circumstances surrounding a merger transaction may introduce "diffusive quantitative results" into the analysis (e.g., a buyer may pay an additional premium for reasons that are not solely related to competitive bidding); (b) the market environment is not identical for transactions occurring at different periods of time; (c) circumstances pertaining to the financial position of the company may have an impact on the resulting purchase price (e.g., a company in financial distress may receive a lower price due to perceived weakness in its bargaining leverage); and (d) the ongoing tax environment at the time of the transaction.

### **Reorganized Debtors—Valuation Considerations**

The estimated Enterprise Value and Equity Value in this section is not necessarily indicative of actual value, which may be significantly higher or lower than the ranges set forth herein. Accordingly, none of the Debtors, Moelis or any other person assumes responsibility for the accuracy of such estimated Enterprise Value. Depending on the actual financial results of the Debtors or changes in the economy and the financial markets, the equity value of the Reorganized Debtors as of the Assumed Valuation Date may differ from the estimated Equity Value set forth herein. In addition, the market prices, to the extent there is a market, of Reorganized Debtors' securities will depend upon, among other things, prevailing interest rates, conditions in the economy and the financial markets, the investment decisions of prepetition creditors receiving such securities under the Plan (some of whom may prefer to liquidate their investment rather than hold it on a long-term basis), changes in federal and state regulations, and other factors that generally influence the prices of securities.

# Footnotes

1. Fully backstopped \$200mm ERO which converts at a 35% discount to a stipulated equity value of \$470mm (compared to a midpoint Plan Equity Value of \$550mm); 10% backstop premium also converts at 35% discount to stipulated equity value
2. \$95mm ERO converts at a post-money stipulated equity value of \$181mm (\$86mm pre-money); backstop is on the amount of the DIP facility (\$75.5mm) plus \$20mm; backstop premium of 10% only earned on the \$20mm portion
3. \$250mm rights offering size subject to increase based on Tranche A DIP holdings that do not elect to convert to equity (up to the Tranche A DIP holdings amount of \$250mm); rights offering and 10% backstop premium convert at a 25% discount to stipulated equity value of \$643mm
4. Rights offering and 10% backstop premium convert at a 35% discount to stipulated plan equity value of \$267mm; stipulated plan equity value reflects \$800mm Plan Equity Value less \$533mm estimated net debt as of the Plan Effective date per Debtors' advisors
5. Rights offering proceeds used to pay down Tranche B DIP Term Loan; rights offering and 10% backstop fee convert to common equity at a 40% discount to stipulated equity value
6. Rights offering proceeds used to pay down Tranche B DIP Term Loan with any unpaid portion converting at the same economics of the rights offering; discount implied by rights offering amount \$75mm for 80% of outstanding equity; Debtors' midpoint plan equity value of \$213mm
7. New Common Stock purchased pursuant to the Rights Offering issued at a 40% discount to settlement plan equity value of \$363mm; the portion of the Rights Offering available to holders of Altera Unsecured Notes Claims and other General Unsecured Claims at Altera and Altera Finance Corp. not backstopped; backstopped portion used to repay \$71.81mm DIP Facility and \$12.15mm IntermediateCo RCF; no backstop fee
8. Rights offering of \$200mm and 10% backstop premium converted at 35% discount to plan equity value
9. Discount to stipulated equity value implied by ERO conversion at an Assumed Equity Value of \$446mm compared to a Plan Equity Value of \$899mm, per the Debtors' Valuation Analysis
10. Rights offering of \$200mm converts at a 25% discount to Deemed Equity Value of \$321mm; backstop premium is not issued at a discount
